SACHSEN-ANHALT CHEMICAL ENTERPRISES
TO CHECK ON QUALITY

TO CARRY OUT THOROUGH INSPECTION -- Taegliche Rundschau, No 40, 16 Feb 50

In line with the trend toward raising the qualitative standard of industrial production throughout Soviet Zone Germany, the Association of People-Owned Chemical Enterprises in Sachsen-Anhalt has instituted so-called quality controls. These plants manufacture common and industrial salt, superphosphate, solvents, paints and varnishes, industrial fats and lubricants, raupenleim (a petroleum product used to protect trees against caterpillars, etc.), candles, polishing wax and shoe polish, peat products, magnesite slabs, pharmaceutical products, salves, dental wax, etc.

The controls are carried out by the laboratory chiefs, assisted by quality supervisors who are selected according to technical qualifications. Raw materials, semiprocessed goods, and particularly finished products are subjected to thorough physical and chemical inspection to prevent waste of raw materials and unsatisfactory results due to use of inferior materials. Quality standards and uniform inspection methods have been devised.

FULFILL TWO-YEAR PLAN -- Taegliche Rundschau, No 52, 2 Mar 50

The fluorspar plant in Gehren (Thuringen) was the first of the factories comprising the Association of People-Owned Calcium and Salt Plants to complete the Two-Year Plan by 20 February 1950.

The Apolda plant of the people-owned Chemical Laboratories also fulfilled the Two-Year Plan ahead of time.
